

FIRE RESISTANCE HIGH STIFFNESS & HIGH STRENGTH NATURAL REINFORCEMENT

BASALT FIRE BLOCKING INTERLINER for transportation seating (train, bus, metro, ...)

The basalt BCF does not melt nor shrink in the flame and – when not mechanically stressed – keeps its geometric integrity. This opens the sector of fire blocking. The basalt coated fabric is used as **fire-blocking interliners for mass transportation seatings**.

Note the obtained certification, according to BS5852:1990 section 5 (crib 7), from Siemens AG [12] for a BCF woven fabric as fire-blocking bus and train seat interliner.
